Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chess, (US 6,192,512).

As per claims 1-26, Chess teaches a system for processing command line input, the system comprising: a command line interface comprising a set of executable commands; and a command line processor for, at least; parsing the command line input; identifying one or more macros within the input, expanding the one or more macros into at least one executable command of the command line interface, and executing the commands independent of compilation.

(Abstract, cols.2-8)

Chess teaches the use of interpreters that are often embedded inside application program subsystems for a specific language in which the word processor macros are written. Chess teaches a macro with an application program subsystem, having a macro interpreter, so as to detect a presence of

Art Unit: 2182

potential viral activity. The method includes the steps of: (a) making an API call with a program, the API call identifying the macro and specifying an initial virtual environment within which the macro is to be interpreted; (b) interpreting in turn individual instructions of the macro; (c) altering the virtual environment in response to interpreted instructions; and (d) notifying the program upon the occurrence of an alteration to the virtual environment that triggers a predetermined notification criterion. The step of notifying the program can also take place upon the occurrence of the interpretation of the macro triggering a predetermined termination criterion. Therefore, it would have been obvious to one of ordinary skill that Chess teaches the use of interpreters that expand the macro – line by line –before compilation into an executable file.
